Studio LED display

Installing LED in a broadcast situation is very different to any other application. Studio Berar has successfully installed the largest LED indoor display in the Balkans region at Grand Show TV Studio. The result is a true technological advancement in the use of LED inside a TV Studio.

Measuring 154 sqm, the LED wall is the first application in a studio environment in Serbia. Due to its stable performance over time and the fact that no consumables are needed, the LED is the perfect choice for the investment with a low operational expenditure.

Darklight's LED display offers many benefits such as unequalled brightness and extreme viewing angles, ultimate system reliability and true color reproduction & authentic video quality. Studio Berar enables fast set-up, easy service and full control over both video and data sources. Combined with our application software for display management and control, the indoor LED display products provide a complete solution for visualization. Studio Berar will provide you with design; engineering, installing and complete servicing you can rely on.

Studio Berar je ovlašćen zastupnik renomiranih svetskih proizvođača profesionalne audio i rasvetne tehnike, video projekcione i LED opreme, sistema najrazličitijih binskih konstrukcija i trussing sistema kao i konzumne HiFi audio opreme.
